

ALLIANCE FOR TRIBAL CLEAN ENERGY GRANT WRITING SUPPORT PROGRAM

Background >>>

In collaboration with our technical and Tribal engagement teams, the Alliance Policy team provides invaluable support to Tribes through expert project planning and grant writing services, delivered at no cost. Our goal is to enhance the success rate of Tribal applications, ensuring that valuable resources are directed toward Tribal initiatives with the greatest impact.

Purpose >>>

The Alliance for Tribal Clean Energy works directly with Tribes and their Tribal partners to support the development of successful grant applications. Our goal is to bridge existing experience and capacity gaps individual Tribes may have as they navigate what are often complex grant development processes.

The Alliance's Clean Energy Grant Support Program comprises three sequential but independent, go-no-go grant development stages. To ensure the efficient use of Alliance resources, Tribes must meet well-defined milestones to move forward to the following support stage.

All successful grant application efforts require the active and sustained participation of Tribal members during each support stage. Additionally, most grant development efforts require significant Tribal community engagement during and frequently before Support Stage 1 begins.

Alliance Tribal Grant Program >>>

Support Stage 1:

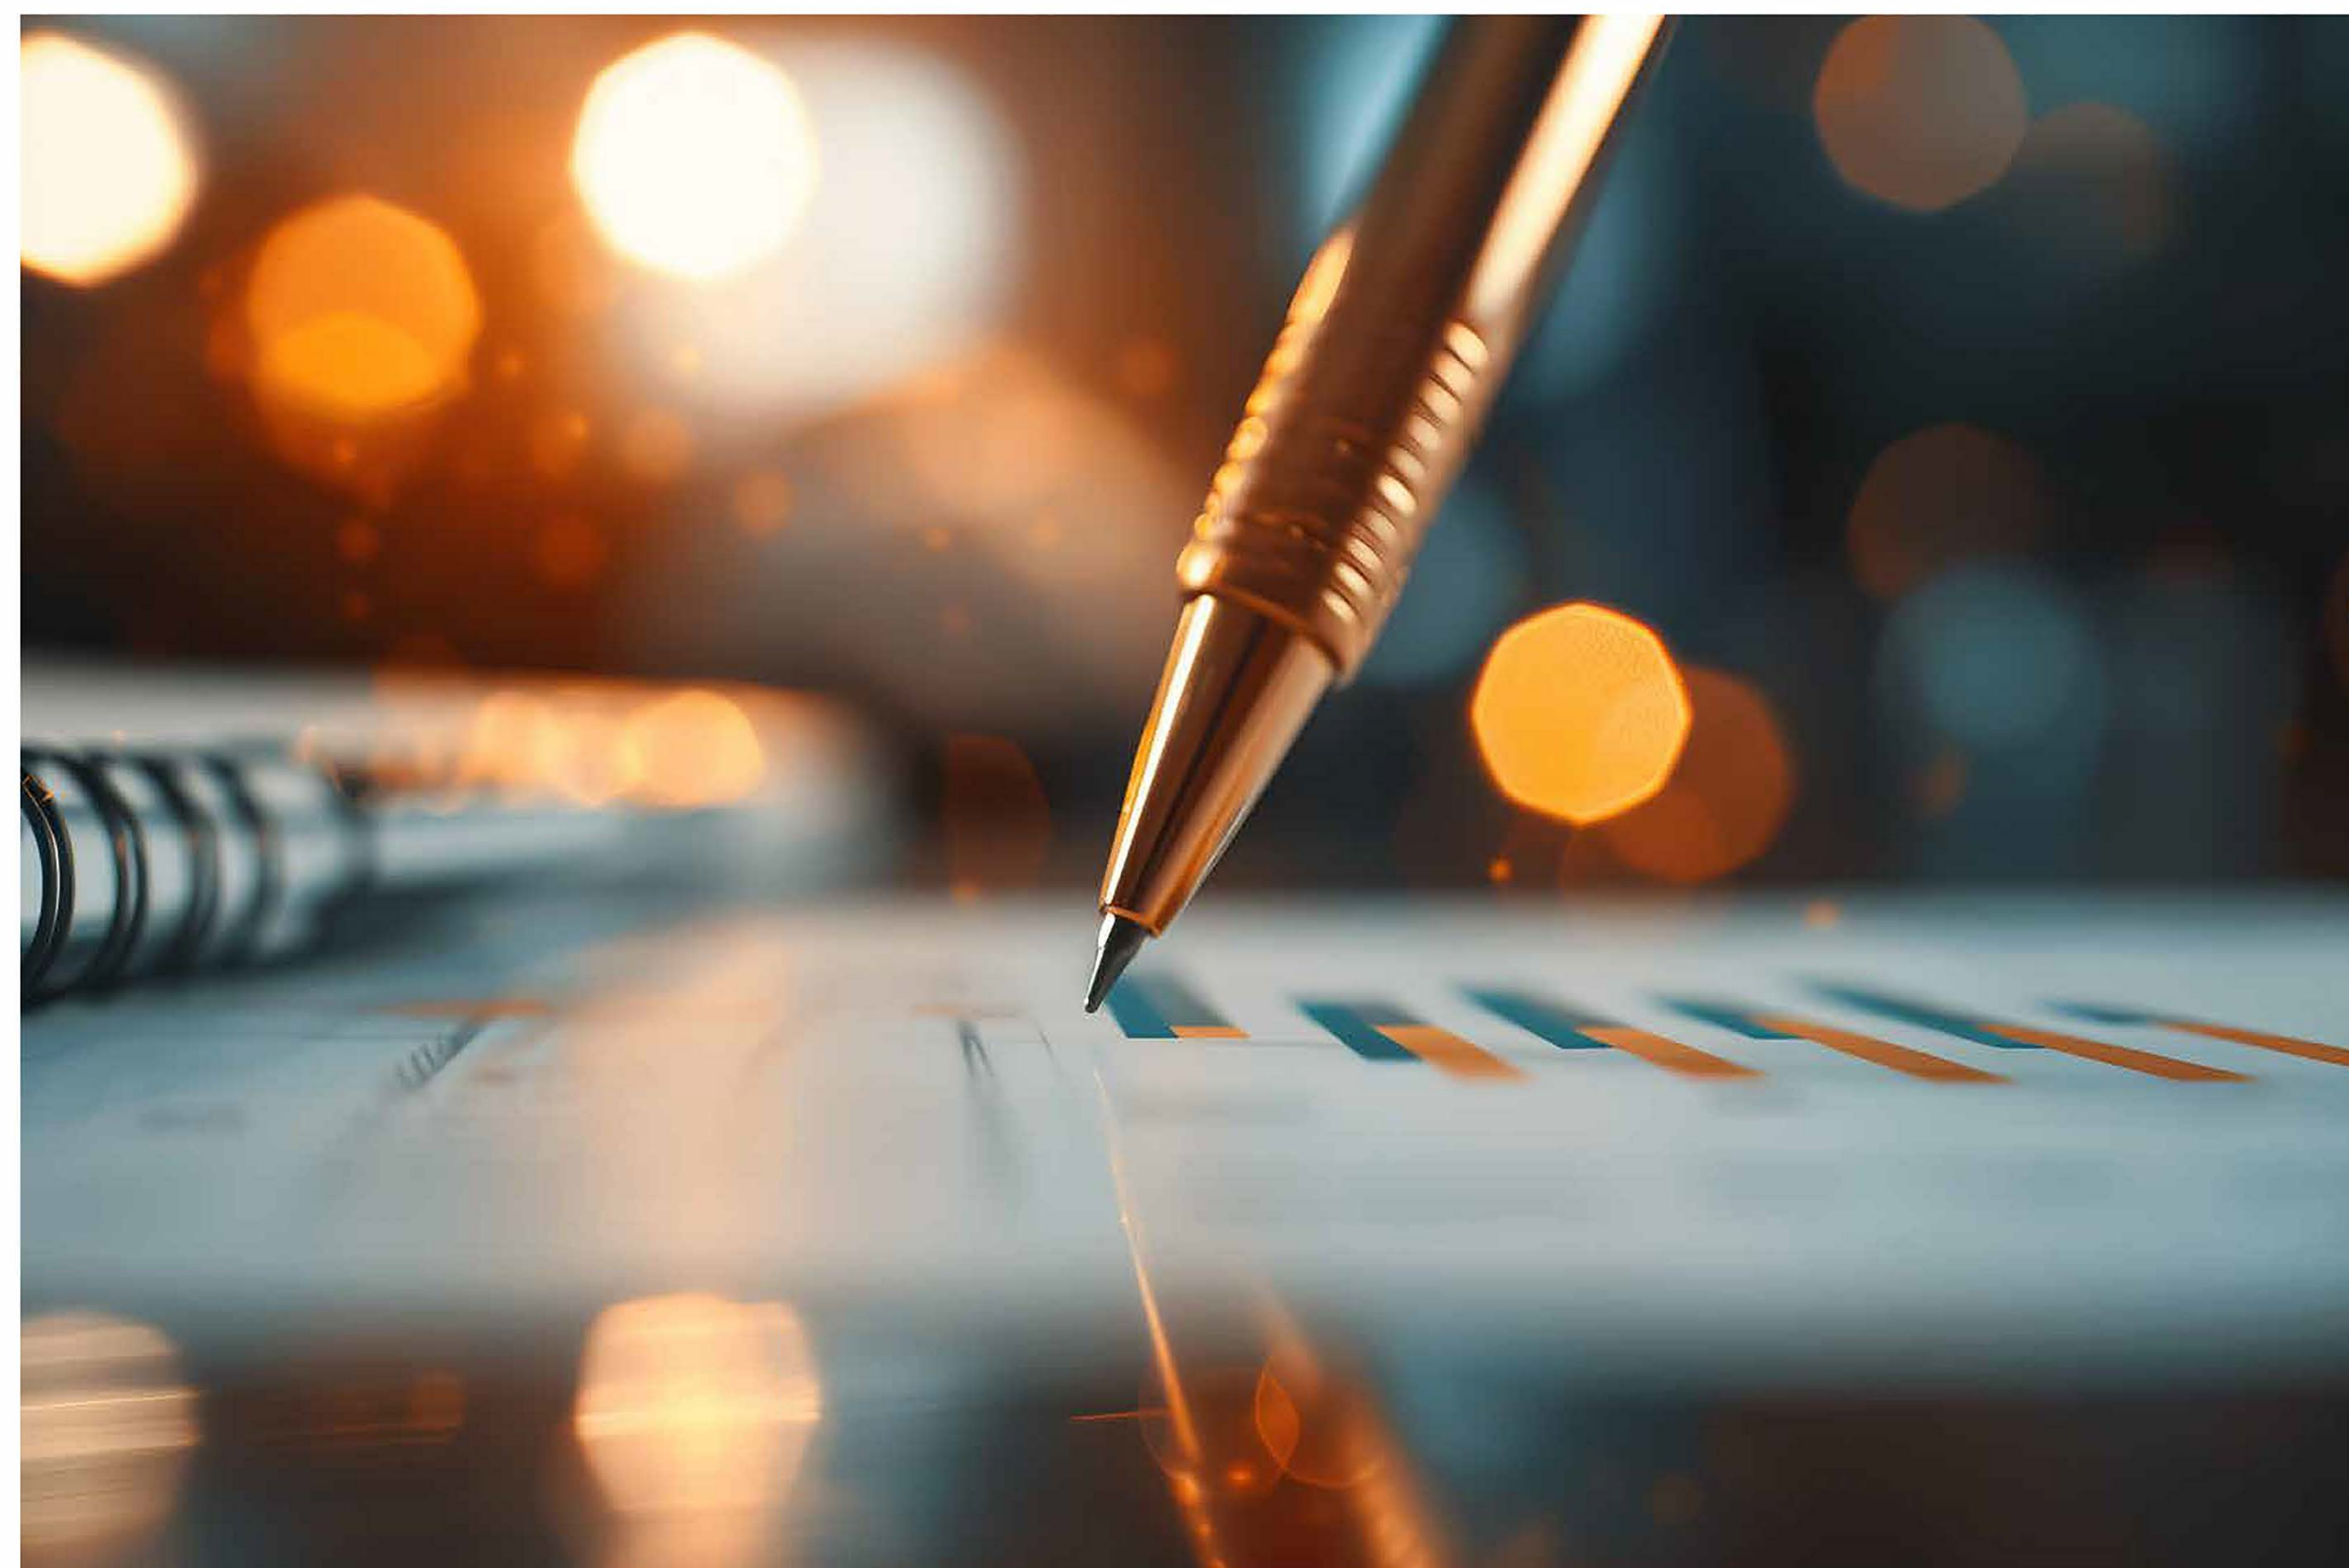

Pre-Application Grant Strategy, Project Assessment, and Tribal Engagement

Support Stage 2:

Pre-Application Project Scoping, Budgeting, and Work Plan

Support Stage 3:

Application Development, Writing, Compliance Review, and Submission

Types of Grants >>>

As federal funding is becoming less available and more tenuous, the Alliance grant program is pleased to offer support for any funding opportunity, including state, corporate, and philanthropic opportunities.
